

# Google I/O 2026 Updates

Google I/O is Held in May 2026, Google announced sweeping upgrades across Search, Workspace, creative tools, hardware, and education. Every announcement pointed in one direction: AI as your co-worker, not just your assistant.

# 12 Key Tools You Need to Know

Tool	What It Is	Who It's For
Gemini 3.5 Flash	Google's fastest and smartest model yet. Beats previous Pro models on coding, reasoning, and agentic benchmarks.	Developers, researchers, power users
Gemini Omni	Accepts image, audio, video, and text as input – and outputs video grounded in real-world knowledge.	Content creators, educators, marketers
Gemini Spark	Your 24/7 personal AI agent inside Gmail, Docs, and Workspace. Takes action on your behalf automatically.	Business owners, professionals, teams
Daily Brief	A morning digest auto-generated from your Gmail, Calendar, and Tasks. Prioritized before you start work.	Busy professionals, managers, founders
Universal Cart	AI that tracks prices, monitors deals, and shops across apps when a product hits your target price.	SMBs, procurement teams, frequent shoppers

Google Pics	Text-to-design tool. Create flyers, social graphics, and infographics from a simple text prompt. No design skills needed.	Small businesses, educators, community managers
Stitch	New AI creative tool for visual content ideation and production workflows.	Designers, content teams, creators
Google Flow (Upgraded)	AI filmmaking now with music generation and Gemini Omni. Produce full video productions from a brief.	Video creators, marketers, trainers
NotebookLM in Workspace	Embedded inside Workspace Studio automation flows. Use your own documents as a live AI knowledge source.	Operations teams, educators, knowledge workers
Antigravity 2.0	Standalone agentic coding desktop app. AI agents write code, build features, and manage files.	Developers, engineers, technical teams
Android XR Audio Glasses	Intelligent Eyewear launching Fall 2026. Partners: Samsung, Warby Parker, Gentle Monster. Works with Android and iPhone.	Early adopters, field workers, mobile professionals
Gemini for Science	Unifies 30+ life science databases — UniProt, AlphaFold, AlphaGenome — under one AI research interface.	Researchers, medical professionals, students

# For Business Owners

Google I/O 2026 is the most business-relevant Google event in years. These tools are not just for developers. They are built for teams, founders, and people running real operations.

## Automate Your Inbox

Gemini Spark reads your inbox, identifies what needs action, and executes tasks on your behalf. Pair it with Daily Brief for a morning digest that tells you exactly what matters today.

## Create Content Without a Designer

Google Pics turns a text prompt into a finished graphic — social posts, event flyers, training materials. No Canva, no Photoshop, no freelancer required.

## Shop Smarter

Universal Cart uses AI to track prices across apps and shops automatically on your behalf when a product drops to your target price.

## Build Internal Workflows

NotebookLM is now embedded inside Workspace Studio automation flows. Use your own company notebooks — internal SOPs, client documents, research notes — as a live AI knowledge source.

# Automate Your Inbox & Calendar

Gemini Spark lives inside Gmail and Google Docs. It reads your inbox, identifies what needs action, and executes tasks on your behalf. Pair it with Daily Brief — a morning digest that sifts through your Gmail, Calendar, and Tasks and tells you exactly what matters today.

- **Gemini Spark** is included in Google AI Ultra for Business (Workspace add-on)
- **Daily Brief** requires no setup — it learns from your connected Google accounts
- **Voice commands** in Gmail, Docs, and Keep let you run tasks completely hands-free

# Create Content Without a Designer

Google Pics turns a text prompt into a finished graphic – social posts, event flyers, training materials. No Canva, no Photoshop, no freelancer required. For video, Google Flow now includes music generation and Gemini Omni, making full marketing videos possible from a written brief.

## Google Pics

Built for non-designers: teachers, shop owners, community managers.

## Stitch

Handles more complex visual content workflows for creative teams.

## Google Vids

Workspace adds AI avatars for training and announcement videos.

# Shop Smarter & Build Internal Workflows

## Universal Cart

Universal Cart uses AI to track prices across apps and shops automatically on your behalf when a product drops to your target price. For businesses that procure regularly, this is a quiet but powerful automation.

## NotebookLM in Workspace

NotebookLM is now embedded inside Workspace Studio automation flows. Use your own company notebooks — internal SOPs, client documents, research notes — as a live AI knowledge source inside automated processes.

- **Ideal for** onboarding flows, client FAQs, and internal knowledge bases
- **No copy-pasting** into prompts — your notebooks are the source of truth

# Google AI Plans — Pricing Reference

## Google AI Pro

Approx. Rs. 1,700/month  
— Gemini 3.5 Pro, Deep  
Research, NotebookLM

## Google AI Ultra

Approx. Rs.  
20,000/month — Gemini  
Spark, highest model  
limits, early access to  
new tools

## Google AI Ultra for Business

Workspace add-on with  
enterprise-grade limits  
and team features

# For Students & Learners

## NotebookLM Inside Google Classroom

Students aged 18+ in higher education can create NotebookLM notebooks tied directly to their Google Classroom courses. Upload lecture slides, readings, and notes — then generate audio overviews, ask questions, and get structured summaries from your own material.

## Gemini LTI — AI in Your LMS

Gemini LTI brings the Gemini app and NotebookLM directly into third-party Learning Management Systems like Moodle, Blackboard, and Canvas. Students access course-specific AI guidance without leaving their course environment.

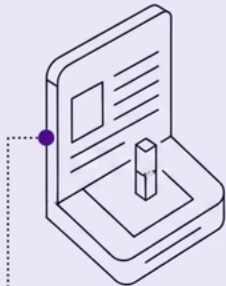

## Voice-Powered Learning

Voice capabilities in Google Docs and Keep let students brainstorm, outline, and organize their work hands-free. A messy brain dump becomes a structured document. A verbal summary becomes a clean set of revision notes.

## Expanded Limits for Education Accounts

If your institution has Google Workspace for Education Plus or a Teaching and Learning add-on, you now get higher NotebookLM limits at no extra cost — more notebooks, more sources, and more queries per session.

# For Educators

	<p><b>GOOGLE AI PROFESSIONAL CERTIFICATE</b></p> <p>Practical skills &amp; potential college credit, available free.</p>	<p><b>OVER 100,000 GEMINI CERTIFICATIONS</b></p> <p>Earned by educators &amp; students globally.</p>
